EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ryan McCarthy on 05/25/05.

The application has been amended as follows:

A) In claim 1, line 9, after the word "rotor" insert --- ; the stator segment core including a stack of stator plates;

and the stator plates including a radially outer rim section;

and a tooth section that extends radially inwardly from a center portion of said radially outer rim section;

and projection extending from opposite sides of a radially inner end of said tooth section;

and a first and second end caps connected to opposite face surfaces of said stator segment core; and

first and second end cap retainer sections that extend along said projections and that connect said first and second end caps,

wherein said first and second end caps and said first and second end cap retainer sections reduce movement of said winding wire during use ---.

B) In claim 9, line 11, after the number “65%” insert --- ; projections extending from opposite sides of a radially inner end of said tooth section; and first and second end caps connected to opposite axial ends of said stator segment core; and

first and second end cap retainer sections that extend along said projections and that connect said first and second end caps, wherein said first and second end caps and said first and second axial end cap retainer sections reduce movement of said winding wire during use ---.

C) In claim 16, line 12, after the word “section” insert --- ; projections extending from opposite sides of a radially inner end of said tooth section ; and first and second end caps connected to opposite axial ends of said stator segment core; and

first and second end cap retainer sections that extend along said projections and that connect said first and second end caps, wherein said first and second end

caps and said first and second end cap retainer sections reduce movement of said winding wire during use ---.

D) Cancel claims 2, 3, 5, 6.

E) Cancel claims 13, 14.

F) Cancel claims 18, 19.

G) In claim 4, line 1, change "3" into --- 1 ---.

H) In claim 7, line 1, change "2" into --- 1 ----.

2. The following is an examiner's statement of reasons for allowance: the prior art fails to disclose, in combination with all the limitations, a switch reluctance machine with the end cap and end cap retainer structure extending axially and being used for reducing movement of the winding wire during use.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Julio C. Gonzalez whose telephone number is 571-272-2024. The examiner can normally be reached on M-F (8AM-5PM).
